the app.

The Trucker Tools driver app allows drivers to consistently track loads, from beginning to end. We will not store your location data unless you are currently tracking a load. Follow the steps below to START and END load tracking.

Select Allow Once Prompted

prompted to change it upon opening

are not set correctly you will be

If your location settings on your device

You will receive a text message with a

track. Click the link to either download

link once the broker creates the load

or open the Trucker Tools app.

Select Enable for Location

The app will also prompt you to enable location before tracking. Once selected, you will be taken to your settings to make adjustments.

Location

6

Trucker Tools requires that your location permission is set to Always Allow to ensure accurate tracking information. Trucker Tools will not use your location if you are not actively tracking a load or using our mobile app.

Notifications

Enable notifications for load updates and tracking reminders.

Enable

Select Start Track

Select the Link

Once your location settings have been adjusted, the Trucker Tools app will display a green box to Start Track.

Once your location settings are set correctly and tracking has been started, the app will show Tracking On.

Pause or End Tracking

Scroll to the bottom to pause or end load track. Note that pausing will require you to enter a restart time and ending the track might prompt you with load actions to complete.
