# Load Track: Correct an asset ID

Select the correctly formatted asset ID to initiate tracking on a Load Track receiving the status, **Provided asset value is not found for this carrier**.
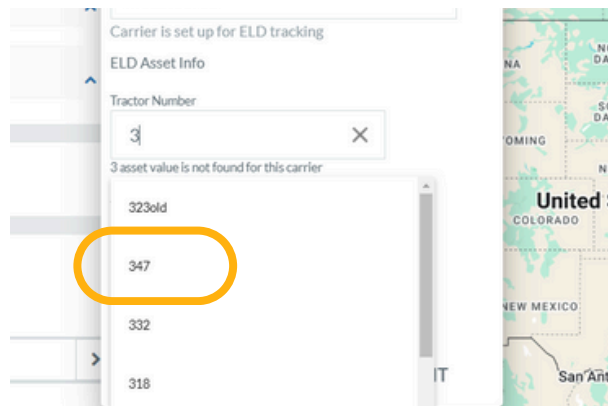

1 **Access the Load Track details page**
In the Load Track portal, select **Modify ELD**, in the top-right corner.

2 **Use Trucker Tools Fuzzy Match to select the correct value**
Click in the truck or trailer number field, and start typing to populate the asset list dropdown list.

Select the best-matched value from the list, and click submit.

3 **You have successfully tracked!**
The load will initiate tracking in 10-15 minutes if the current time is within 12 hours prior to the scheduled pickup time. If not, the track will initiate at the 12 hour mark.
